

Our History

Founded in 1994, Nover Engelstein & Associates, Inc. has differentiated itself from the traditional software companies by analyzing and translating government regulations into a powerful easy to use Windows based software enforcement tool called WinWam.

Our Mission

To provide government and industry with the software tools that promote safety, accurate measurement and equity, which in turn protects consumers and businesses from unfair and dangerous practices.

WinWam Clients

Comprise 22 State Governments, numerous counties, cities, USDA GIPSA and commercial organizations.

WinWam

Device Inspection Software

In today's complex world it is critical to possess the knowledge and tools to effectively enforce or comply with ever changing government regulations. WinWam Software helps both government and industry meet this challenge by providing a number of software modules that combine powerful applications with industry standard Windows based technology.

Device Inspection

WinWam DEV (Device Inspection Software) is a comprehensive software package designed for Weights & Measure Officials to perform and record NIST Handbook 44 inspections. WinWam Device Inspection Software supports all devices specified in Handbook 44 including, but not limited to: **scales**, (apothecary, computing, livestock, shipping, vehicle, etc.), **meters, LP Gas, Liquid Measuring Devices** (gas pumps, etc.), linear devices (fabric measuring devices, etc.), **timing devices** (laundry, parking meters, air pumps, etc.), **taximeters** and miscellaneous inspections.

Calculates Tolerances

Whether *acceptance* or *maintenance*, WinWam Device Inspection Software automatically calculates tolerances for nearly all tests, and allows for extensive customization of inspection data, tests, and tolerances.

Online Inventory of Devices

WinWam Device Inspection Software provides a comprehensive database of business establishment with a complete inventory of devices. Full detail inspection data allows management the ability to better measure the economic impact of the program.

Comprehensive Business Establishment

All of the Inspection modules share a common and complete database of business establishments. Each business can include:

- Location, Mailing and Billing Addresses
- Contact Information
- Demographic Information (FID#, Store ID#, County, etc.)
- Customizable Business Categories
- Online Inventory of Devices
- Inspection History*
- Inspection Schedule*
- Unlimited User Definable Fields

** The inspection history and schedule is automatically updated as new inspections are added.*

Hypertext Handbooks

Hypertext Handbooks are a collection of on-line reference manuals in which the user can view government regulations, search on a particular topic and print any part of the handbook with the touch of a button. Handbook text can also be cut/paste and incorporated into the WinWam Inspections or any Microsoft compliant tool. An electronic glossary of terms is incorporated for instant access to handbook definitions.

NIST Handbook 133, 44 and Publication 19, FDA Food Code & Pasteurized Milk Ordinance

Handbooks are sold separately

Hardware

WinWam runs on a standard laptop PC or Tablet PC and can be carried on inspections. Inspectors also take a portable printer for on-site printing.

Laptop Mounted in Vehicle

Signature Capture

Using a Tablet PC or an external signature pad attached to a laptop, the inspector can capture store owner signature and print a final inspection report either in the field or back at the office.
